Five of a Kind

2-4 Players

**Just get five of one kind
before anyone else!**

Story:

A simple game of building a five card hand all with one thing in common.

The Object:

Collect five cards of any one type: Numbers, Items or Colors

The Deck:

Remove the Jokers and Kingdom cards

The Deal:

Deal five cards to each player and turn one card up for a discard pile. The rest of the deck becomes the draw pile.

The Play:

Starting with the player to the left of the dealer, players take turns drawing one card and discarding one card onto the discard pile. You may draw from the top of the draw pile or the top card from the discard pile.

When you have collected five cards with all the same Number, Item, or Color, lay down your cards to win.

The End:

After someone wins, score their hand based on what they hold.

All the same Color scores 10 points plus the total of all five numbers

All the same Item scores 15 points plus the total of all five numbers

All the same number scores 20 points plus the total of all five numbers

The first player to reach 200 points is the winner!
